

The US imperialists were, are, and will always be the sworn enemies of the peoples of the region

Hillary Clinton out of Greece!

Imperialists out of Greece, Turkey, the Balkans, Cyprus, and the Middle East!

War against the imperialist war!

The visit to Greece of the official representative of US imperialism, Hillary Clinton, is a direct provocation to our people but also to other peoples in the region. It is a show of force of the superpower, first and foremost, against the fighting Greek people.

The representatives of US imperialists visit Greece with audacity in order to confirm their direct intervention in our country and the region.

They come here after the Greek government reshuffling to show to their European counterparts that the superpower wants and can put its stamp in the developments and the balance of powers in the region. It wants mainly the alignment of the regional regimes with the US interests. They also come here in order to support the Greek government, which wants this support after the recent events. The Greek government aligns itself openly with the fascist, zionist state of Israel in its continuous crime against the fighting Palestinian people and everyone who dares to express his solidarity.

Our people must demonstrate again against this visit. We must shout: **THE US ARE UNWANTED!!!** They must go taking with them their bases, NATO, their "aid", and the IMF. We must take again to the streets and the squares.

The Communist Party of Greece (marxist-leninist) calls for common and coordinated demonstrations in Athens and every major city in which we will condemn the American plans and the subjugation of the local government.
